PROFILE

Odoo / ERP Developer experienced in building, customizing, and maintaining Odoo 14 solutions for real business requirements. Strong in Python, PostgreSQL, XML, QWeb, JavaScript, and the Odoo ORM. Focused on translating operational needs into maintainable ERP workflows across accounting, inventory, purchase, sales, reporting, and multi-company operations.

WORK EXPERIENCE

HashMicro

Feb 2024 - Present | Remote

Odoo Developer

- Develop and customize Odoo solutions that support business workflows, operational controls, and ERP integrations.
- Work with Python, XML, QWeb, JavaScript, PostgreSQL, and the Odoo ORM to deliver maintainable modules and resolve production issues.
- Support accounting, inventory, purchasing, sales, reporting, and multi-company processes.

PT. Sama Sama Sukses

Aug 2021 - Jan 2024 | Tangerang, Banten

Odoo Developer

- Customized Odoo 14 modules, views, reports, and workflows for operational requirements.
- Applied Odoo and CSS development skills to improve ERP usability and workflow consistency.

PT. SuryaSukses Adi Perkasa

Feb 2021 - Jul 2022 | Cibitung, West Java

Research and Development Engineer

- Developed product concepts, product designs, and pallet drawings for research and development needs.

PROJECTS

ACCOUNTING AND FINANCE

- Multi-Currency Payment and Reconciliation - partial payments, custom exchange rates, FX gain/loss, bank fees, and multi-company validation.
- Exchange Rate-Based Stock Valuation - currency-aware valuation, stock valuation layers, amount currency, and journal integration.
- Anglo-Saxon Accounting and Invoice Amount Due Fix - AR/AP mismatch, payment terms, stock valuation, and COGS integration.
- Loan Accounting and Reclassification - short/long-term classification, period reclassification, and cross-year journals.
- Down Payment and VAT Handling - percentage/fixed down payments, VAT, and accounting calculation rules.

INVENTORY AND WAREHOUSE

- Multi-UoM Inventory and Stock Valuation - UoM ratios, lot/UoM counts, rounding, and FIFO fixes.
- Lot-Based Stock Reservation and Traceability - lot selection, location and hierarchy filters, validation, and reservation logic.
- Picking and Picking Approval - approval before validation, automatic qty_done, and backorder handling.
- Stock Quant Reservation Override - available-stock calculation and custom outgoing reservation.
- FIFO Valuation Fix - valuation-layer adjustment and lot/UoM interaction.
- Lot Assignment from Purchase - PO lot input propagated to receipt and move lines.
- RMA and Return Management - returns, forced refunds, custom UoM, and picking-based shipments.

PURCHASE AND SALES

- Vendor Pricelist Customization - vendor-specific prices, supplier tax integration, and price rules.
- Tax-Aware Purchase Pricing - included/excluded tax calculation and custom PO amounts.
- Product Category-Based Purchase Filtering - category-based products, vendors, and user access.
- RFQ and PO Dynamic Numbering - date-based document numbering.
- Intercompany Purchase-to-Sales Automation - automatic SO creation, mapping, confirmation, and multi-company validation.
- Sales Product Filtering - dynamic product domains and category-based access.

WORKFLOW DASHBOARD AND PRODUCT

- Dynamic Multi-Level Approval Workflow - approval matrix, sequences, multiple approvers, rejections, feedback, and audit tracking.
- Receiving Control Dashboard - supplier receiving PLAN vs ACT monitoring, delays, filters, pagination, and timezone handling.
- Product Part Number Search - extended indexed product search across operational documents.
- Product Category Access Control - user-specific category access and dynamic vendor/product domain.

HR REPORTING INTEGRATION AND MAINTENANCE

- HR Assessment and Psikotest Workflow - applicant, branch, company, results, and approvals.
- HR Time-Off Reporting and Views - filters, tree/kanban views, grouping, and server actions.
- Work Order Management - sequence, sales reference, service-team workflow, and notes.
- Custom Purchase and Invoice Reports - QWeb inheritance, layouts, fields, notes, and rendering fixes.
- Advanced QWeb and PDF Reporting - custom report actions, templates, and pipeline debugging.
- Approval Notifications - email, reminders, Qiscus/WhatsApp integration, deadlines, and approval URLs.
- Odoo Technical Maintenance - ORM, XML, QWeb, security, PostgreSQL, module upgrades, and production troubleshooting.

DESIGN AND PRINT PRODUCTION

- Design and Print Production Project - prepared customer packaging designs, matched print colors to references, and calibrated design software on printing machines.
